PROFESSIONAL SUMMARY

Lead Unity Developer with 5+ years of experience building games and interactive experiences across mobile, PC, WebGL, VR/AR and multiplayer projects. Hands-on with Unity/C#, gameplay systems, technical architecture, optimization, tools, AI, shaders/VFX and project delivery.

CORE SKILLS

Unity & C# Gameplay Programming Architecture & Tools	**Multiplayer** Networking Game Systems	**XR / VR / AR** Unity XR Toolkit AR Foundation
Platforms Mobile • PC • WebGL	**Technical** Optimization • AI Shaders • VFX • UI/UX	**Leadership** Technical Lead Project Management

PROFESSIONAL EXPERIENCE

Independent Unity Developer / Game Developer | Self-Employed

May 2026 - Present

- Developing original games and interactive experiences using Unity and C#.
- Working across multiplayer, PC, mobile, WebGL and immersive/XR projects.
- Handling gameplay systems, networking, UI/UX, tools, optimization, testing and technical polish.
- Managing projects from concept and prototyping through playable builds and release preparation.

Lead Developer & Project Manager - Unity | Snack Group

Jun 2025 - May 2026

- Led Unity development and technical delivery for interactive projects spanning games, VR/AR, virtual showrooms and mobile applications.
- Coordinated technical work with internal and external teams and translated requirements into production tasks.
- Oversaw Unity architecture, technical design, implementation and optimization of complex interactive systems.

A314LAB

Lead Unity Developer | Sep 2024 - Jun 2025

- Led gameplay systems and mobile/WebGL game architecture.
- Managed builds, performance optimization and technical delivery.
- Built reusable Unity tools, framework components and plugins to improve development workflows.

Unity Developer / Game Designer | Nov 2023 - Sep 2024

- Prototyped and developed Unity games from client requirements and gameplay concepts.
- Optimized project performance and contributed to 3D, game design and UX.

Unity 3D Developer (Freelance) | Virtu 360

Sep 2024 - Nov 2024

- Developed 3D interactive experiences for architecture and real estate.
- Built simulation, shader and architectural visualization systems in Unity, including multiplayer functionality.

PROFESSIONAL EXPERIENCE - CONTINUED

AppCake IT

Technical Lead | Jun 2023 - Nov 2023

- Led technical development of Unity-based games and applications.
- Designed gameplay systems and scalable mobile project architecture.
- Managed builds, performance optimization and technical delivery.

Unity Developer | Nov 2022 - Jun 2023

- Developed Unity games and applications for Android/iOS.
- Created internal tools and Unity plugins, prototypes and Game Design Documents.
- Refactored codebases and collaborated with project/production managers and engineering teams.

Founder & Project Manager | Silest Studio

Sep 2021 - Jun 2024

- Built and published 11+ mobile games using Unity and C#.
- Managed projects from concept through development and release, including GDDs and internal tooling.
- Handled game design, technical development, marketing and project planning.

SELECTED PROJECTS

Manikin Mimic | PC / Steam / Multiplayer

Independent multiplayer game developed in Unity/C#, including networked gameplay systems, player interactions and production-ready game systems.

The Saint | PC / Steam / Horror

Independently developed and released a PC horror game, covering gameplay, systems and end-to-end production.

Wall Insulation Simulation | VR / Simulation

Real-time VR training experience with custom interaction, insulation spraying, shaders and feedback systems.

A314 Core Game Framework | Unity / Tools / Architecture

Modular reusable Unity framework with game systems, backend integration, player data, editor tooling and reusable UI components.

EDUCATION

BTS - Senior Technician Diploma in Computer & System Programming | Sep 2019 - Jul 2021
